

The Agriculture Advisory Committee is pleased to report that with the closing of the H. Boss farm December 2011, the total of preserved farmland in Holland Twp now stands at 1968 acres.

It is expected that five additional farms will close in 2013 adding approximately 377 more acres of preserved farmland and bringing that total to 2345 acres!

Our goal is to bring the total of preserved farmland to 3000 acres by the end of 2017.

Additionally, preserved open space in the Township totals just less than 1800 acres.

Please see the Township map showing the locations of preserved land.
